

HALLOWELL SCHOOL SHOP FURNITURE

STEEL WOODWORKING BENCHES

free standing

Every HALLOWELL woodworking bench is designed and fabricated to obtain longest possible service with least possible maintenance. The cabinet base types offer the utmost in versatile bench storage. The HALLOWELL steel bench legs, which are industry standards, embody a functional optimum for open bases models. Superb

design, rugged construction, optional units and assorted accessories make every HALLOWELL bench a sound investment in utility and economy.

Benches shown on this page are free-standing type. Wall benches with cabinet or locker bases are also available. Write for Bulletin 2112 Rev.

SPECIFICATIONS top materials

"SHOP TOP"

LAMINATED WOOD TOP

"SHOP TOP"—This exclusive HALLOWELL top has a core of solid laminated block construction, and is faced both top and bottom with a 1/4" or 3/8" thick layer of Resinwood, a composition of uniform wood particles and natural resins bonded under heat and pressure into a smooth, high density material. Its tough, durable surface is splinter-proof and resistant to acids, alkalis, oils and greases. Can be refinished like wood.

WOOD—HALLOWELL wood tops are edge laminated hardwood. Seasoned, kiln-dried, selected hardwood strips 1 3/4" wide are electronically glued and reinforced. Tops 64" x 54" have either 5" wide bolster or steel spline at each end.

SPECIFICATIONS (continued)**BASES**

cabinet—All welded heavy gage steel with interlocked deep flange construction. Channel-reinforced doors have 2-point latching device with cylinder locking handles. Two keys supplied for each lock. Cabinets have one adjustable shelf which can be removed to store large items. *Additional shelves available.* Tops attach directly to cabinet, or steel angles are available for securing cabinet to top and floor. See table for dimensions and number of cabinets in base.

locker—Constructed of heavy gage steel with self-closing, spring-hinged doors containing pulls and padlock attachments. Provision is made for flat key locks, if desired. Tops attach directly to lockers, or angles are available for securing lockers to top and floor. See table for dimensions and number of lockers in base.

open—All-steel base consists of HALLOWELL all-welded bench legs with integral cross braces. Leg assemblies are secured rigidly by ribbed steel stringers. Legs are available in four widths and three heights. See table for dimensions.

FINISH

Tops are coated with clear, durable finish on work surface and edges. Undersides are coated with moisture-resistant sealer.

Bases are phosphate coated, then finished with tough, long wearing SPS green baked-on enamel. Other colors available at additional cost.

ACCESSORIES

A variety of bench dogs, adjustable bench stops, locks, number plates and other accessories are optional at additional cost. Master keys for all drawer, cabinet, locker and door locks are available. Benches can be ordered with or without vises, as desired. See Bulletin 2112 Rev. for complete details.

GENERAL INFORMATION

All lockers are assembled and shipped in 6-locker units. Cabinets are shipped assembled and ready for installation. Open benches are shipped knocked down. All tops and accessories are packaged separately. Because hole requirements for dogs and stops vary, request Form 102 to indicate number and location of stops, dogs and holes wanted.

School shops can be completely outfitted with HALLOWELL standard units at a fraction of the cost of custom-designed equipment. The items shown on these pages have been specifically developed for industrial arts and vocational shops. They are identical in material, construc-

tion and quality to HALLOWELL shop equipment that has been standard throughout industry for many years.

The complete line of HALLOWELL school shop furniture is listed and described in Bulletin 2112 Rev., available on request.

HALLOWELL Drawing Tables and Service Units

Here is the solution to multi-class drawing instruction. Each student is assigned a drawer and a drawing board which are stored in the service unit. Before class, the student takes board and drawer to table, which has slides under-

neath to hold drawer. After class, student returns both drawer and board to service unit, making room for next class. Using the same tables, as many modular service units may be obtained as necessary to accommodate varying day and evening classes.
